PROFILE

Ambitious Registered Nurse turned Full-Stack Developer with a passion for building intuitive, user-focused digital experiences. I bring a unique blend of analytical thinking, systems-level problem-solving, and real-world empathy to every project.

With a strong foundation in modern web technologies and a curiosity-driven mindset, I thrive in fast-paced environments where I can learn, adapt, and contribute to impactful products.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS/SASS,

Backend: Node.js, Express.js, REST APIs, Axios, OAuth

Database: MySQL, Knex.js (ORM)

DevOps & Tools: Jest, Rest Testing Library, Git, GitHub, Postman, Docker, NPM, Vercel

Development Practices: Agile, Accessibility, Scalable Architecture, Data Privacy (HIPAA, PIPEDA)

Healthcare Systems: EPIC (hospital EHR), Meditech

Analytic Tools: PowerBI, GTM, G4M

SELECTED PROJECTS

Solo Software Engineer

FEB 19, 2025 - FEB 28, 2025, BrainStation Capstone

- [FocusFlow MVP](#): Built a comprehensive platform using React.js, Node.js, and MySQL, integrating a timer, drag-and-drop UX, and RESTful APIs with component testing (Jest, React Testing Library), and deployment via Vercel.

Back-End & Development Lead - Software Engineer

FEB 12, 2025, Microsoft x Brainsation Industry Hackathon

- [AI Business Consultant Prototype](#): Developed a full-stack AI tool using JavaScript, React, and Node.js to guide small businesses through key operational decisions. Showcased **rapid prototyping** and problem-solving skills within a 24-hour sprint.

Partner Developer - Software Engineer

JAN 30, 2025, BrainStation Pair-Programming Hackathon

- [TaskVibes Application](#): Developed a React-based productivity tool using JavaScript, Express.js, and third-party API integrations to streamline task management and enhance user productivity.

FORMAL EDUCATION

BrainStation | Diploma, Software Engineering

NOV 2024 - FEB 2025, Toronto, ON

University of Toronto | Master of Health Informatics

SEPT 2021 - MAY 2023, Toronto, ON

Toronto Metropolitan University | Bachelor of Science in Nursing

JAN 2014 - APR 2018, Toronto, ON

WORK EXPERIENCE

Contract Software Engineer

TORONTO, ON | MAR 2025 - PRESENT

- Designed and developed commission-based custom websites, collaborating with clients to translate their business visions into responsive, user-centred digital solutions.
- **Recent Projects:**
 - [Data Science Career Prep Website](#): (React, Node.js, Vercel, Squarespace)
 - [Travel Keepsake Business Site](#): (in progress - HTML, CSS, JavaScript, React)

Public Health Nurse | Digital Health Systems Specialist

York Region Public Health Unit - YORK REGION, ON | NOV 2020 - FEB 2024

- **Built and launched** a digital intake platform used by 300+ clients to streamline assessments and improve service delivery across municipal health programs.
- **Integrated Salesforce** into case management workflows and **leveraged PowerBI** dashboards to modernize operations and replace paper charting.
- **Collaborated with IT teams and municipal leadership** to enhance system interoperability, and upheld provincial regulations and cross-department efficiency.

Registered Nurse | Health Technology Implementation Specialist

Mount Sinai Hospital - TORONTO, ON | OCT 2018 - NOV 2021

- **Collaborated with cross-functional teams to implement EMR systems (CERNER)**, training 90+ clinicians in Agile workflows and accelerating adoption speed by 30%.
- **Designed and built structured onboarding and implementation processes** to support scalable, sustainable integration of digital tools across clinical teams.
- **Contributed to hospital-wide digital transformation** by addressing system inefficiencies and aligning clinical needs for workflow optimization.
- Adapted quickly in dynamic hospital settings, maintaining a customer-first approach.

Health Information Analyst | Medical Record Specialist

Marble API (formerly known as MedChart) - TORONTO, ON | JUNE 2020 - AUG 2021

- **Led and mentored a team of four Medical Record Specialists**, developing workflows and training programs to improve the efficiency of health data processing.
- **Performed detailed reviews of medical records**, assigning tags based on predefined criteria against machine-generated tags, while also training the accuracy of **machine learning algorithms**.
- **As one of two healthcare professionals within the team**, I played a key role in expanding the SaaS platform by ensuring compliance with American and Canadian privacy regulations (HIPAA, PIPEDA) during the transfer of medical records between healthcare providers and third-party requestors, including legal representatives and insurance companies.
